

# FERNANDO SANCHEZ

210-254-5607 | San Antonio, TX | [fernandosnhz@gmail.com](mailto:fernandosnhz@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## Junior Software Engineer | Full-Stack Developer | Software Engineer I

Junior Software Engineer with hands-on experience building full-stack web applications, REST APIs, internal automation tools, dashboards, and SQL reporting solutions. Skilled in JavaScript, TypeScript, React, Python, Flask, SQL, Supabase, Git, GitHub, HTML, CSS, and Tailwind CSS. Experienced in developing and maintaining production web applications for real business use, automating workflows, validating data, troubleshooting issues, and collaborating with cross-functional teams.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS

**Frontend Development:** React, Tailwind CSS, Responsive Design, User Interfaces, Dashboards

**Backend Development:** Flask, REST APIs, API Integration, CRUD Operations, Authentication, Session Management

**Databases & Cloud Tools:** Supabase, SQL Databases, Database Queries, Data Validation, Reporting

**Developer Tools:** Git, GitHub, VS Code, Debugging, Technical Documentation

**Software Engineering:** Full-Stack Development, Frontend Development, Backend Development, Object-Oriented Programming, Agile Collaboration, Requirements Gathering, Troubleshooting, Workflow Automation

## SOFTWARE ENGINEERING HIGHLIGHTS

**Full-Stack Development:** Built production and portfolio applications using React, Flask, JavaScript, TypeScript, Python, SQL, Supabase, HTML, CSS, Tailwind CSS, and REST APIs.

**Backend Automation & API Development:** Developed JavaScript-based automation workflows and API-driven submission processes to streamline internal H-E-B Procurement case creation and reduce manual processing.

**Database Reporting & Data Validation:** Built and executed SQL queries to generate reports on inventory, supplier activity, product classifications, procurement cases, and item setup trends.

**Production Application Experience:** Deployed and maintained a full-stack property management web application with authentication, dashboards, CRUD functionality, automated notifications, and ongoing bug fixes.

**Cross-Functional Collaboration:** Worked with business teams, vendors, associates, and stakeholders to gather requirements, resolve issues, document processes, and improve operational workflows.

## PROJECTS

### [Morales Rental Homes](#)— Production Full-Stack Property Management Application | React, Supabase, Twilio, Resend

- Developed and deployed a production full-stack property management application for a real rental business, supporting public listings, applicant registration, resident portals, and administrative workflows.
- Designed role-based resident and administrator dashboards for maintenance requests, lease document access, tenant communication, and property management.
- Built CRUD functionality for property creation, editing, image uploads, document management, and maintenance tracking.
- Integrated Supabase authentication, database services, and session management to support secure user access.
- Developed automated email and SMS notification workflows using Resend and Twilio for showing reservations, reminders, cancellations, and tenant communication.
- Maintained the application after deployment by managing feature releases, bug fixes, system updates, and ongoing business-requested enhancements.

[Engineering Productivity Dashboard](#) | React, REST API, Software Metrics

- Built a React dashboard backed by a REST API to track software delivery metrics including throughput, cycle time, and issue status.
- Implemented filtering, status visualizations, loading states, error states, and demo-data fallback to improve reliability.
- Documented setup, run steps, and troubleshooting instructions for repeatable local development.

[F-Analytics Data Dashboard](#) | Python, Streamlit, Pandas

- Built an interactive analytics dashboard in Python using Streamlit to explore KPI trends from public retail and finance datasets.
- Used Pandas to clean, filter, and analyze data from Kaggle Superstore and related business datasets.

PROFESSIONAL EXPERIENCE

**Product Compliance Analyst** Jul 2025 – Present  
**H-E-B – San Antonio, TX**

- Develop internal automation workflows using JavaScript and API-driven submission processes to streamline H-E-B Procurement case creation and reduce manual data entry.
- Build and execute SQL queries to generate reporting on inventory, supplier activity, product classifications, procurement cases, and item setup trends.
- Analyze and validate product data across internal systems to identify discrepancies, improve reporting accuracy, and support compliance decisions.
- Collaborate with cross-functional teams to gather requirements, troubleshoot process issues, and improve internal workflow efficiency.
- Create documentation and provide technical guidance to junior associates on reporting, internal processes, and system workflows.

**Service Lead-Cashier-Bagger** May 2021 – June 2025  
**H-E-B – San Antonio, TX**

- Managed business center documentation and reporting, ensuring accuracy, policy adherence, and audit-ready records.
- Partnered with cross-functional teams to clarify requirements, resolve operational issues, and support process improvements aligned with SOPs.
- Monitored inventory and shrink trends, flagged anomalies, and coordinated with department leads to address discrepancies and prevent recurrence.

EDUCATION

**Bachelor of Business Administration (BBA), Accounting Minor in Computer Science**  
**University of Texas at San Antonio | San Antonio, TX | Jan 2020 – May 2025**

**Honors:** Honor Society Member, 2023–2025; SCLA Honor Society Member, 2023–2025

**Relevant Coursework:** Programming I & II, Data Structures, Software Development Fundamentals, Discrete Mathematics for Computer Science, Object-Oriented Programming, Database Systems
